CURRICULUM VITAE

HI, I'M MARIO GRIMALDI

>_ LET ME INTRODUCE MYSELF

I started out as desktop software developer and gradually moved into web development, which I dedicate most of my time to (together with mobile development). I earned my diploma in IT Consultancy at the high school "IIS Blaise Pascal" in Reggio Emilia with a final grade of 83/100. I am about to get my bachelor's degree in IT Engeneering at the "Universita' degli Studi di Parma" while working for a web agency on a part-time base. I have always been very courious and willing to learn more not just about IT and I often find it fun to combine technology with everyday life in order to make new discoveries. My long-term goals involve concluding my bachelor's degree program and moving abroad. I think that stepping outside of my own country will make me develop as a person and enhance my career in more stimulating and open-minded environments.

- >_ Videogallery;
- >_ Web service for iOS app;
- >_ Contributed in developing the Geo Faceted Search platform;

Other projects:
- >_ Server side video conversion and publishing on web video platforms;
- >_ App iOS Package Explorer Tetrapak;

Also Contributed in developing some Liferay themes.

>_ CONTACTS

Describing myself in such few sentences is pretty difficult, but if I piqued your curiosity here below you can find all that boring information I have deliberately avoided up to this point but that are necessary in order to get in touch. Thanks for your time and consideration.
