CURRICULUM VITAE

HELLO MY NAME IS MARIO GRIMALDI

>_ A BRIEF INTRODUCTION TO MYSELF

I started out as a desktop developer and then moved to what now covers most of my time: web and mobile development (iPhone, iPad and Windows Phone). I got a high school diploma as IT expert at the IIS Blaise Pascal in Reggio Emilia with a grade of 83/100. I am currently finishing my studies at the faculty of Computer Engineering at University of Parma. I am always looking for new things to learn, and I like to combine technology with the everyday problems to make new discoveries. My near goals are to graduate (3 years) and continue with a 2 years degree, hopefully overseas, all this without losing touch with the world of work from which I learned a lot so far.
